PM ANALYSIS & VERDICT

BULL CASE:

- + PAT up 207% YoY — massive earnings recovery from FY25 stress
- + P/E 15.6x — CHEAP for a bank growing 29% YoY (PEG < 0.6)
- + RSI 55.7 — NOT overbought, still has room to run
- + GNPA 2.16% improving, PCR 85% — asset quality stabilizing
- + FY27 guidance: 25% advances growth, ROA 1.8-2.0%
- + Massive volume (68M shares) — institutional accumulation
- + Trading at 2x book vs 3-4x for mature SFBs — re-rating potential

BEAR CASE:

- Zero promoter holding — fully diluted, no strategic anchor
- Microfinance exposure — vulnerable to asset quality shocks
- ROE 10.8% FY26 — below cost of equity (needs to sustain 18%+)
- GNPA 2.16% still elevated vs large banks (0.5-1%)

VERDICT: BUY — STRONG VALUE PLAY

P/E 15.6x with 207% PAT growth = deeply undervalued
RSI 55.7 = not overbought, entry timing is good
Near 52-week high but earnings justify it (PEG < 0.6)
Not in our Large & Midcap 250 universe — manual tracking only
Target: Rs 85-90 (15-25% upside based on 2x FY27E book value)
